Reliance[®]

500 SERIES SURGICAL STOOLS

Model 540

The Model 540 is the most economical in the 500 Series. It incorporates all the standard features that make Reliance hydraulic surgical stools world famous for comfort and efficiency. The 15" diameter seat is made of high-density, 2" polyfoam. Cushioned backrest may be added later.

Model 546

The Model 546 enhances the versatile design of the Model 540 with an adjustable, tilting, upholstered backrest. Its horizontal and vertical adjustments and a tilt feature ensure that the Model 546 adapts to the individual requirements of every practitioner. Standard seat diameter is 15".

Model 548

The sloped "waterfall" construction of the Model 548's 3" polyfoam seat eases pressure under the thighs. Cushions measure 16" and 14" for wider support, while a curved, tilting backrest adjusts vertically and horizontally.

Model 556

The Model 556, our top-of-the-line surgical stool, features an upholstered three-way, wrap-around arm, for exceptional abdominal, back or arm support. Its deep polyfoam seat offers support and comfort for lengthy procedures and long days in the O.R. Shown with optional floor lock.

Exceptional Stability

All Series 500 stools have five legs to distribute weight evenly and ensure stability. Furthermore, the circumference of the base exceeds that of the seat to maintain stability even in the elevated sit-stand position. Mobility is provided by rugged two-and-a-half inch casters molded from hard rubber. Seats on all 500 Series Stools swivel 360° independently of the base, so height isn't affected. Swivel of stool seat may be locked by lifting foot pedal.

Adjust Height Hands Free

A convenient foot pedal easily raises or lowers the stool height without using hands. Total vertical travel is 7 1/2 inches.

Finished for Durability

All exposed metal, except the aluminum base, is chrome-plated steel. Base and legs are finished in tough, black epoxy enamel.

Choice of Three Heights

STANDARD seat height spans from 17 1/2" to 25" above the floor. MEDIUM seat height, for surgical use, spans from 20 1/2" to 28". Add "M" to stool model number when ordering. HIGH seat height, for surgical use, spans from 24" to 31 1/2". Add "H" to stool model number.

Upholstery

All stools come with black as standard, but you can match your office or treatment room decor with our selection of 14 easy-to-maintain vinyl colors. Other vinyl colors and nylon tweed inserts are available at additional cost. All materials are fire retardant. To request a color selection card, contact your dealer or call Reliance at 1-800-735-0357.
